

Home Assignment. Display and Position Properties

Mentor-Review ETC: 2 h.

You need to submit this task for review.

Watch the video lessons to complete this task. If you have any questions, you may ask your mentor’s help via the use the real time chat on the learning platform. You can find it on the down right corner of your screen.

After you submit the completed task, mentors will review it and send their feedback via email. Don’t worry if your work is not approved: you can always retake the assignment, and it won’t affect your final grade.

Task 1: Style Paragraphs with CSS Properties

Goal

Use CSS properties to layout the design and style images in an HTML file.

Instructions

To accomplish this goal, follow these steps:

Step 1

Download the [“index.html”](#) and ["style.css"](#) files, and open them via Visual Studio Code. Open the [“index.html”](#) file also in your browser.

Inside these files, you will see the pre-written code. You can start coding from line 40 in the CSS file. Make sure that these files are in the same folder.

In the browser, you will see two boxes: red and blue. However, there are actually four boxes in the HTML file. Explore the HTML and CSS code to understand which box is of which color.

Step 2

Align the red box to the top, and the blue box to the bottom. The width of both boxes should fit the screen width.

Step 3

Align the green box to the left, and the black box to the right. The height of both boxes should fit the screen height.

Step 4

Correct the message’s position and structure. It should be placed in the center:

```

    "
    Set your target and keep trying
    UNTIL YOU REACH IT
    "
```

Step 5

Save your work, and convert the folder with HTML and CSS to a [“.zip”](#) file.

Expected Output

After completing the assignment, you should see the following result:

How to upload completed tasks

To upload the assignment, make a [“.zip”](#) archive containing all the necessary files, and upload the file [here](#).
